

Dealership Technology Optimization Program

Snap-on commercial grade computers.

Professional Solutions. Snap-on Assurance.

As the world's leading hardware and software provider to dealerships, Snap-on Business Solutions (SBS) understands the rigors your computer hardware must endure in a dealership environment. With the Dealership Technology Optimization Program, we are able to offer computer hardware solutions to fit your entire dealership to ensure smooth operations across the entire business.

Our commercial-grade equipment is specifically designed to perform in your dealership environment. Dirt, vibration, high traffic, temperature and humidity—we have considered it all with the solutions we offer.

The Dealership Technology Optimization Advantage

Snap-on's Hardware Offerings

Desktop PCs

Dual Monitor Stands

22-27 inch Monitors

Laptops

Mini-PCs

Printers

Servers

“I can't tell you how pleased we've been with Snap-on's hardware in our dealership. We were looking for speed and reliability for our network. I feel we have gotten just that. This business is all about 'Right Now' not what can you do for me later. Every minute that can be saved looking up parts or booking a deal can be a game changer and the PCs that were installed here have made the difference! We have an outside IT company and they have made comments on how awesome these PC's really are.”
