

GM Installation on Standalone/Server

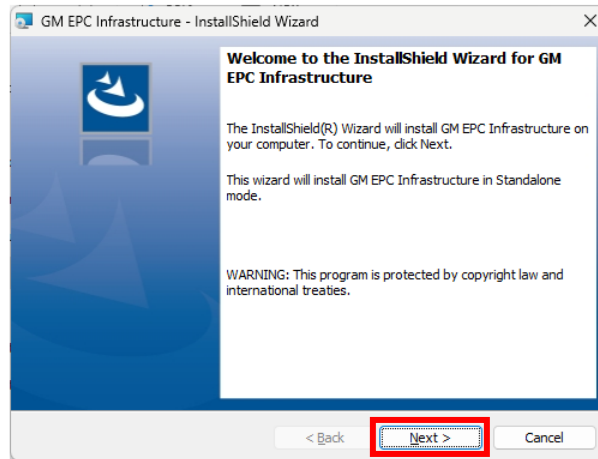

- For Server/Client setups, install the GM EPC on your server.
 - For Standalone setups, install the GM EPC on your Windows 10/11 PC.
1. Plug the GM installation flash drive into a USB 3.0/3.1 port. If File Explorer doesn't open, press "**Windows + E**," then select "GMNA" from the left pane to view the contents.
 2. Double-click "**Setup**" to start the installation. Choose your language and click "**OK.**"

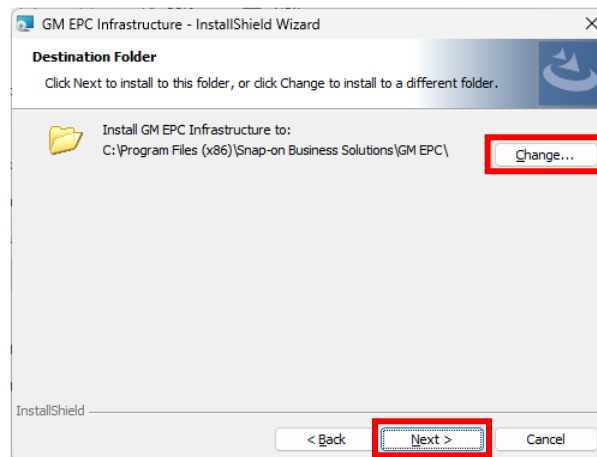

3. The status window shows the installation progress.

4. Click "**Next**".

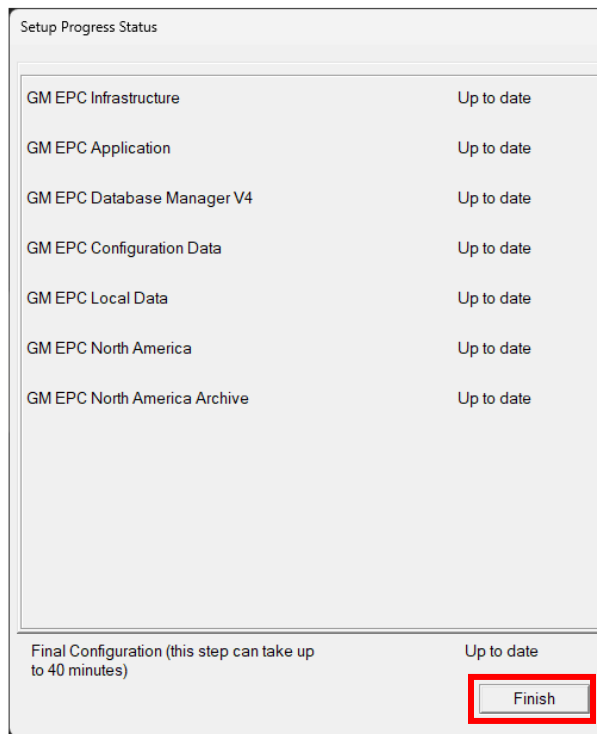

5. Click "**Next**" if the default C:Drive location is correct. To change the install location, click "**Change.**" Click "**Next**" when the location is correct.

6. Click "**Install.**"

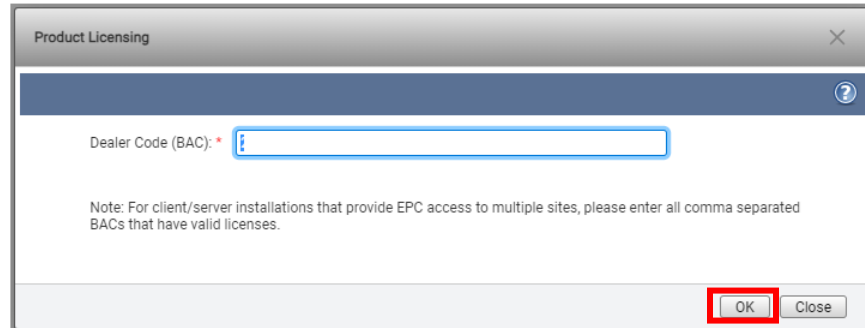

7. A progress indicator window will appear. When complete, if all components show **“Up to date”** and the **“Finish”** button is visible, the installation was successful. Click **“Finish”** to close this window.

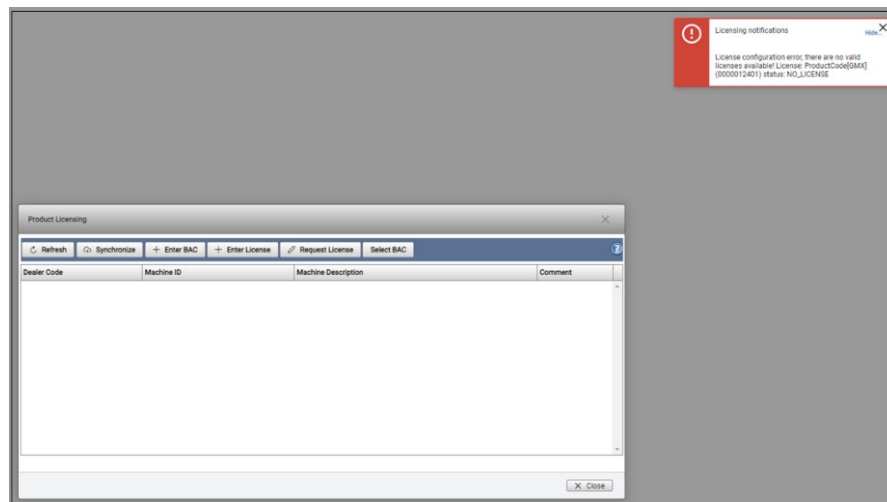

8. For a **“Standalone”** configuration, double-click the **“GM EPC”** icon.  If this is a **“Server/Client”** configuration, skip steps 9 and 10, and jump to the **“Installing GM EPC on a Client PC”** section below.

9. Enter your **GM BAC code** and click “**OK.**” If the GM EPC opens, the installation is complete.

10. If the screen below appears, GM EPC can't find a valid license for your Dealer ID. Contact Snap-on Tech Support at **800-656-4772**.

Installing GM EPC on a Client PC (Server/Client configuration)

1. Note your Server's name, then go to your client PC (Windows 10/11).
2. Press “**Windows + R**” to open the “**Run**” window.
3. In the “**Open**” field, enter **** followed by your server's name (e.g., **\\SS12345**), then click “**OK.**”

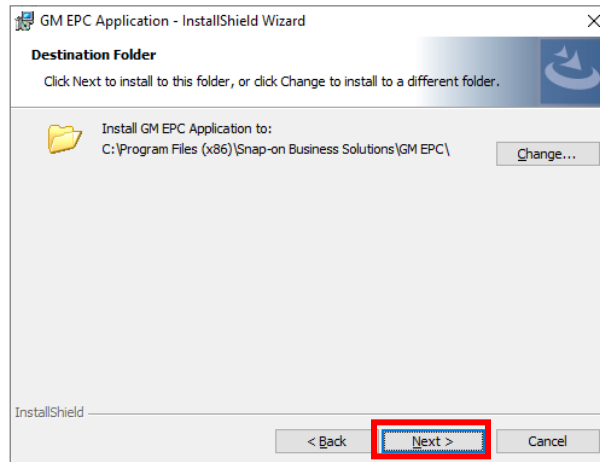

4. A File Explorer window will open. Double-click the “**GM EPC Client**” folder to open it.
5. Double-click “**Setup.**”
6. Select your language and click “**OK.**”

7. Click “**Next.**”

8. Click "**Next**" if the default C:Drive location is correct. To change the install location, click "**Change.**" Click “**Next**” when the location is correct.

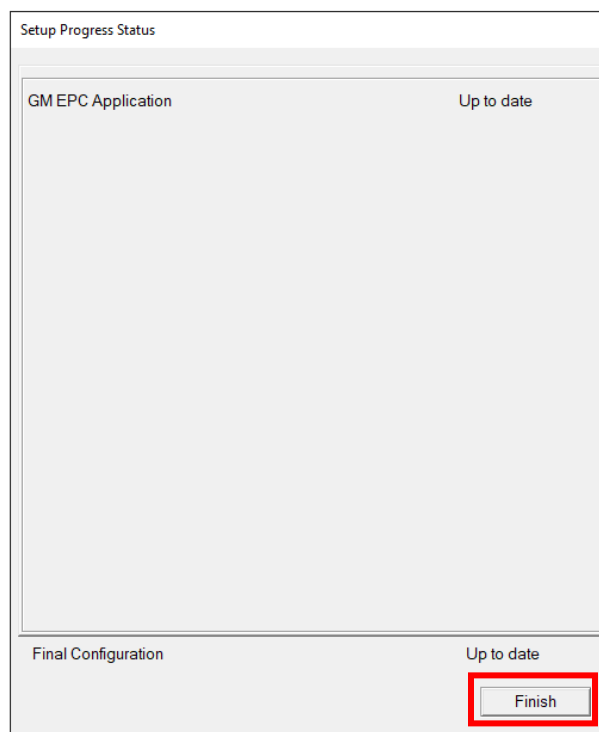

9. Verify the **“Application Server”** field has your server's name, then click **“Next.”**

10. Click **“Install.”**

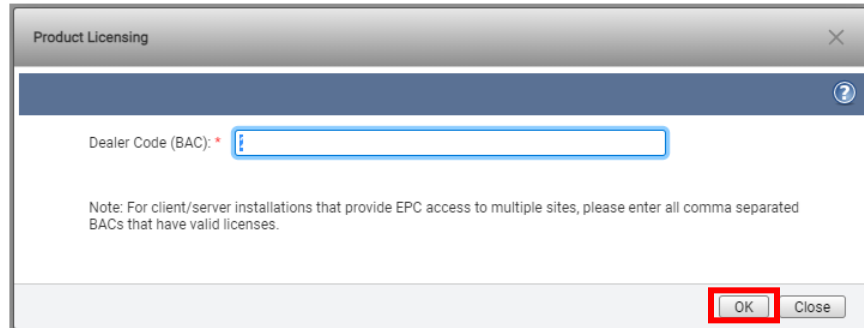

11. Click “**Finish.**”

12. Double-click the “GM EPC” icon.

13. Enter your **GM BAC code**, then click “**OK**”. If the GME EPC opens, the installation is complete. **NOTE:** If launching the EPC on the first client is successful, this screen will not appear on the remaining clients.

14. If the screen below appears, GM EPC can't find a valid license for your Dealer ID. Contact Snap-on Tech Support at **800-656-4772**.
