

# GM Global EPC Updates are Here!

We are pleased to announce the following exciting updates to the GM Global EPC. You will see them on the web-delivered EPC via Global Connect on February 28, 2025. The locally hosted USB media will be mailed on March 13, 2025. As always, we are grateful for your input, which has powered these changes. So, keep the suggestions coming as we work together to develop future improvements!

## Additional Part Attributes

Two new tabs have been added to the **Part Details** window to help you make better informed decisions when specifying parts. The **Product Info** tab displays the Product Description, Regulatory Info (Prop65 Warning), Features, and Additional Information. **NOTE:** The old **Warning** and **Additional Info** tabs have been removed since this information has been moved into the Product Info tab.

Part Details 88967122

**LINEING KIT, PARK BRK SHOE (INCLS 11,12) (\*KIT1) (ACDelco #171-0892) (TWO CLIP POINTS FOR PARK BRAKE SHOE)**

Part #	88967122	Name:	Parking Brake Shoe Lining Kit
Callout #	13	Usage:	K1 (43) (LQ9,M32,GT5,G80,Y91) (2ND DES)
Location:	TX04-051 - PARKING BRAKE ASM (JC4,JH1)		

**Product Info** Specifications Part Images Price Labor / Service

## Delete Multiple Part Notes in a Single Transaction

Save time and increase efficiency by selecting multiple Part Notes, or all of them, to delete at once instead of removing them individually. On the **Manage User Notes** screen, click the top left checkbox to select **all User Notes** or select the checkbox on each individual line that you want to delete.

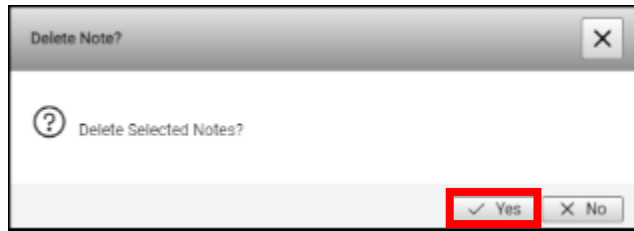

**Manage User Notes**

Show: **All Notes**

## Update the EPC Landing Page and Wrapper Detection

We've introduced enhanced visibility and control around the GM Global EPC wrapper detection and loading process. This update ensures that users are better informed of what's happening during the process, preventing unintentional interruptions, and providing an option to download the wrapper.

Key Updates include **Clear Notification of Wrapper Detection and Loading**. You will now see real-time notifications when the GM Global EPC system detects and begins loading the wrapper. This provides a clear indication of the ongoing process, ensuring users are aware of its status.

You can now **Prevent Unintended Interruptions**. With the new notifications, there will be a better awareness of the wrapper loading, helping avoid accidental actions that could interrupt the process, ensuring smoother workflows.

## Thank You!

For technical concerns, please call the GM EPC Technical Support help desk at **888-994-6372** or [sbs\\_services@snapon.com](mailto:sbs_services@snapon.com).

Do you have EPC enhancement suggestions? Data Issues? "We're listening!" Please send us your feedback from the EPC by selecting **Help -> Contact Us**, then send your comments to [gmpartscatalog@gm.com](mailto:gmpartscatalog@gm.com).
