

GM Parts Connect: Redefining the Parts Experience

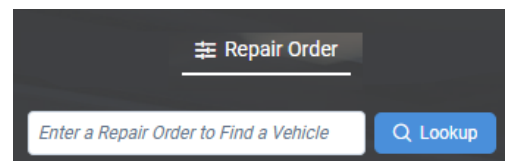

We're introducing the next generation of innovation with GM Parts Connect — an intuitive, thoughtfully redesigned experience that simplifies workflows, accelerates productivity, and elevates how users interact with parts information. A smarter way to find parts, built with efficiency and usability in mind, these updates help streamline everyday tasks while providing faster access to the information you and your team rely on. In addition to all current functionality, the following major enhancements are now available in GM Parts Connect.

Refreshed, modern interface for improved user experience.

- GM Parts Connect's refreshed, modern interface streamlines the parts lookup experience, helping you find the right part faster and more efficiently. It offers multiple intuitive ways to search, powerful filtering options to narrow results, and enhanced visual cues that make it easier to identify and confirm the correct part with confidence.

- You can now perform a VIN lookup using a license plate (where available) or repair job, making it easier to quickly identify the vehicle you're working on without entering a VIN manually.

GM With Natural Language Search powered by the Snap-on Digital Engine you can search using the part name you know—even in different languages, with common terms, or minor misspellings. Parts Connect still finds your part!

- Search for “O2 SENSOR” returns results for “OXYGEN SENSOR”.

Everything You Need to Complete the Repair.

- To see additional information needed to repair the vehicle, access the Part Detail by clicking either the part number or the colored brand indicator next to the part description.

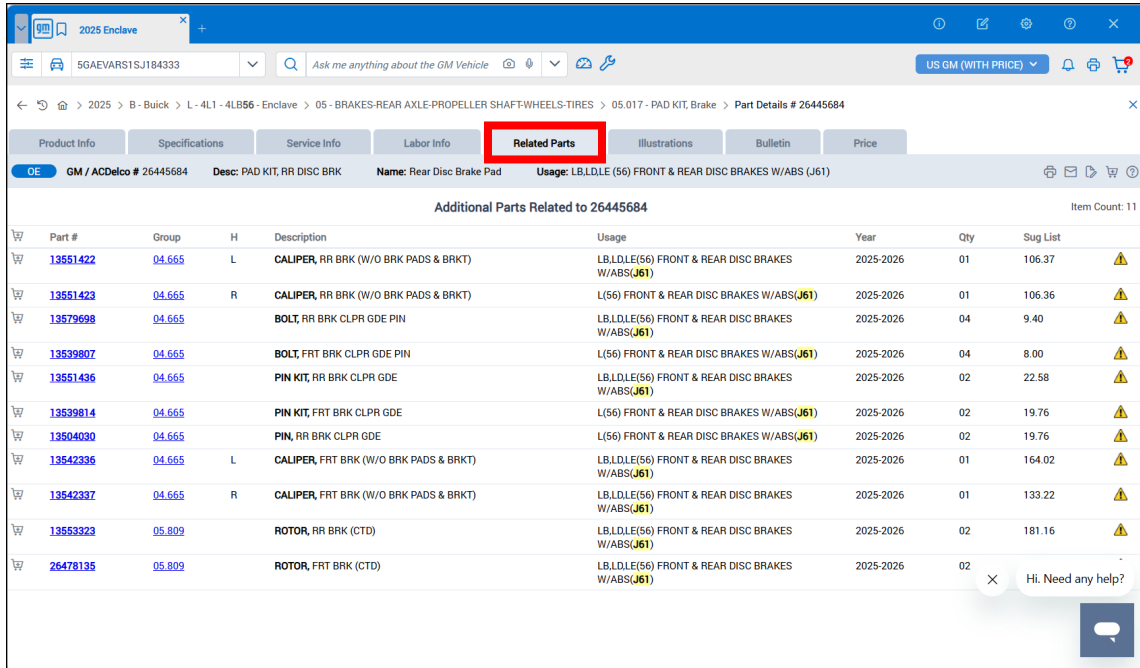

Part #	H	Description	Usage	Year	Qty	Sug List
26445684		PAD KIT, RR DISC BRK (W/SEN)(WITH BPLM) (Service Lane Part)	LB,LD,LE (56) FRONT & REAR DISC BRAKES W/ABS (J61)	2025-2026	01	222.99

A [Service Bulletin](#) applies to this part number. Per GM Service Policies and Procedures, failure to follow bulletin information may result in the rejection of a warranty claim.

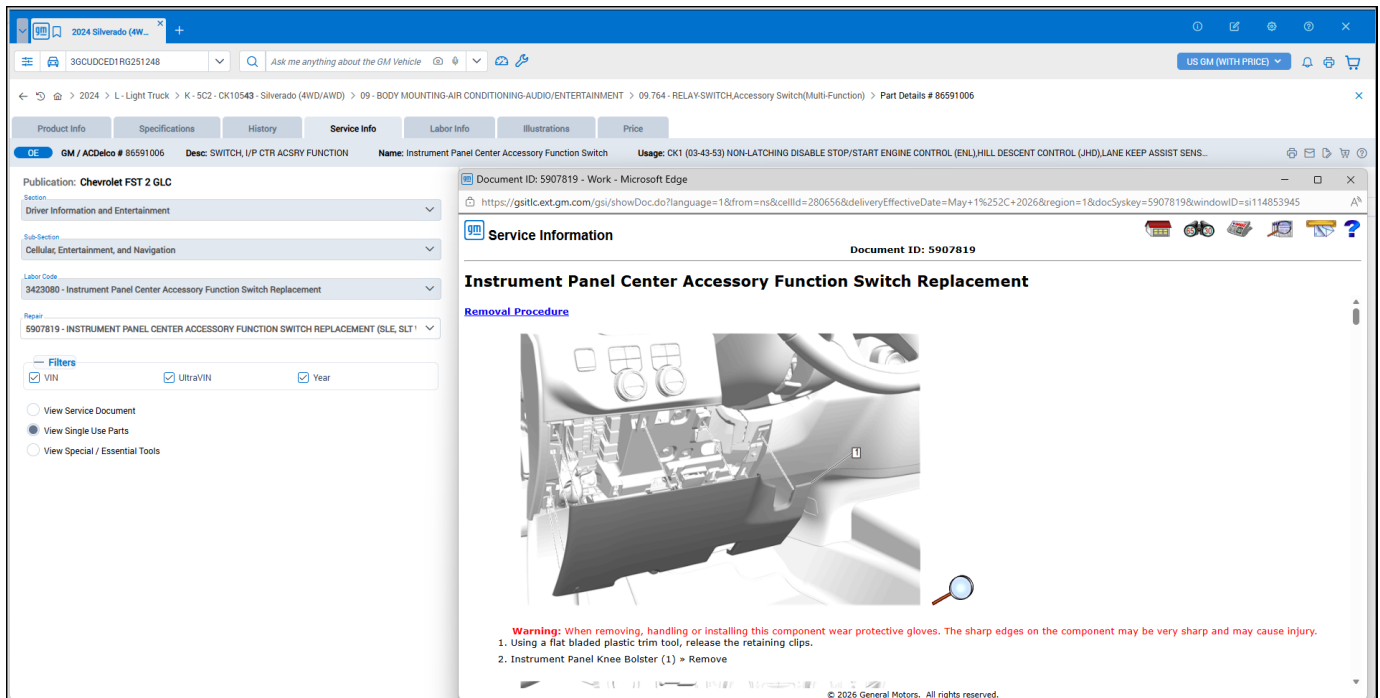

- High-resolution and interactive 3D part images and illustrations enhance the visual experience and enable users to examine parts in greater detail for improved identification and accuracy.

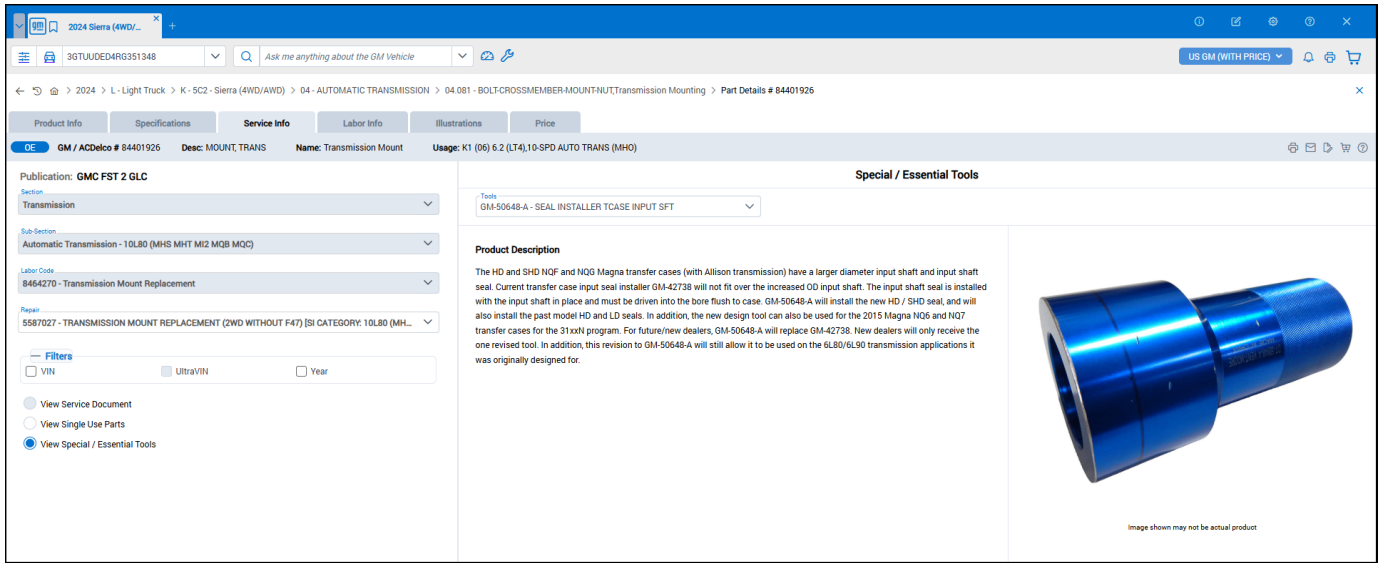

- The **Related Parts** tab on the **Part Details** screen helps you go beyond the primary part by surfacing associated and commonly used parts, making it easier to identify everything needed for the repair and ensuring a more complete and accurate parts order.

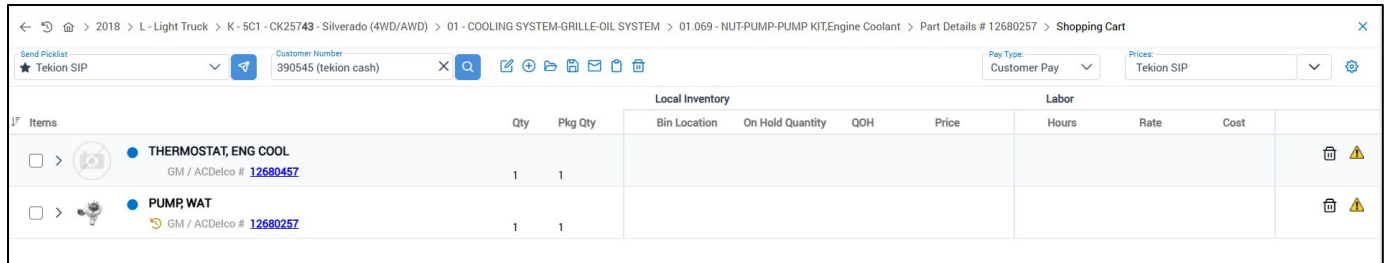

Parts Connect provides visibility into repair procedures and associated labor times for each part - providing valuable context that supports more informed parts selection and a more efficient, end-to-end repair workflow.

The special and essential tools required for each repair procedure are displayed alongside relevant service information - providing a more complete view of the repair process.

For dealers with an integrated DMS: See part price and availability from your own inventory right in your shopping cart. So you can quickly confirm what's in stock, compare prices, and complete your order with greater speed and confidence.
